

Norman Dunn

I was appointed co-opted governor in 2022, this is my first governor role, and I am extremely proud to be part of a committee for such a well-established and principled school.

I work within the technology for a large retailer where I have worked for almost 20 years in various leadership, technical and strategic transformation roles. Currently I lead teams of data engineers building big data to support key decision making.

I live down the road in Coulsdon, am an active member within my Church participating in lots of events and charity activities (time permitting) and you might occasionally even see me going for a run at the local gym. I have a wife and two daughters aged 16, 20 so they can also keep me busy!

I look forward to supporting the school team in continuing to drive forward high educational standards and behaviours.
